 , BELGIUM

Practical information

When Thursday 15 December 2022, 01:00 CET

Host organisation CDTI

Description

The Horizon Europe - Cluster 5 calls 2023 Brokerage Event is an integral part of the Horizon Europe Info Days. The event will target a wide spectrum of companies, universities and researchers from Europe and beyond to foster the creation of consortia for the upcoming Horizon Europe Cluster 5 Calls for 2023-2024 in the following main areas:

- Climate sciences and responses
- Cross-sectoral solutions for the climate transition
- Sustainable, secure and competitive energy supply
- Efficient, sustainable and inclusive energy use
- Clean and competitive solutions for all transport modes
- Safe, Resilient Transport and Smart Mobility services for passengers and goods

Within the Framework of the EC Horizon Europe Cluster 5 Infoday, GREENET, the network of Horizon Europe CL5 National Contact Points, is organizing a networking and brokerage event focusing on the 2023 calls for proposals from the Work Programme of "Cluster 5: Climate, Energy and Mobility".

The main objective of the event is to gather all the relevant stakeholders intending to apply for funding, supporting the development of consortia and project ideas.

Participants looking for partners will have the opportunity to present their own organization and project ideas in 2 different ways:

- Brief oral presentation (4 minutes max.)
- Bilateral meetings (max. 20 minutes each)

The GREENET Brokerage Event will be organized in a virtual mode. Both, pitching session and bilateral meetings will be online through the platform.

The event is free of charge but registration and profile activation are mandatory to attend the brokerage event.

Registration available at:

<https://greenet-brokerage-event-2023.b2match.io/>  - registration closes on 09/12/2022.

More information on how to apply for the Oral presentations/ Pitching session here:

<https://greenet-brokerage-event-2023.b2match.io/page-4481>  -
(Applications to send in by 21th of November).

European Project Office at **Marine Technology Center - CTN**

R&D Institution

Marine Technology Center - CTN

CTN aims to improve the competitiveness of the overall marine and maritime sector through the development of new technological solutions and technology transfer. CTN members are SMEs, large-scale companies, Universities and Research Centres of the marine and maritime sectors. CTN is also a member of different maritime organizations and co-founder of the Spanish Maritime Cluster (CME). CTN encourages the integration of all the actors of the sector with the aim to improve the cooperation and collaboration among them, the search of new business opportunities, the preparation of new innovative solutions and the development of R&D projects. CTN has a wide experience in the development, management and exploitation of European funded projects making it the ideal coordinator for this multi-actor and cross-disciplinary consortium. CTN is the main actor working for the Blue Economy and marine environmental protection in the Region of Murcia.

DESTINATION 1. CLIMATE SCIENCES AND RESPONSES FOR THE TRANSFORMATION TOWARDS CLIMATE NEUTRALITY

HORIZON-CL5-2023-D1-01-01: Further climate knowledge through advanced science and technologies for analysing Earth observation and Earth system model data

HORIZON-CL5-2023-D1-01-07: Modelling for local resilience - Developments in support of local adaptation assessments and plans

HORIZON-CL5-2023-D1-02-02: EU-China international cooperation on blue carbon

DESTINATION 2. CROSS-SECTORAL SOLUTIONS FOR THE CLIMATE TRANSITION

HORIZON-CL5-2023-D2-01-05: Hybrid electric energy storage solutions for grid support and charging infrastructure (Batt4EU Partnership)

DESTINATION 3. SUSTAINABLE, SECURE AND COMPETITIVE ENERGY SUPPLY

HORIZON-CL5-2023-D3-01-03: Floating PV Systems

HORIZON-CL5-2023-D3-01-05: Critical technologies for the offshore wind farm of the Future

HORIZON-CL5-2023-D3-01-08: Demonstration of sustainable tidal energy farms

Electric energy matchmaking Forum for Ukraine support

1 December 2022 - 31 January 2023

Electric energy matchmaking Forum for Ukraine support

[Info](#) [How it works](#) [Online Event](#) [FAQ](#) [Contact](#)

Electric Energy matchmaking Forum brings together **Ukrainian public and private sector companies** which need to recover electric systems; buy new power generating equipment or its components and **EU producers/distributors** of different types of energy equipment who can sell or donate it.

Enterprise Europe Network and EU clusters have joined forces to organize the Forum to promote international partnerships between companies and/or institutions working in the energy and environment sectors to help Ukraine upgrade the country's critical energy infrastructure after Russia's unprovoked and unjustified invasion of Ukraine. Forum will help to identify producers and distributors of energy equipment that could contribute and come up with all possible suggestions to further help Ukraine citizens and businesses in the coming months

2023 will be the European Year of Skills. Understanding how technological change and [digitalisation](#), particularly new intelligent automation or Industry 4.0 technologies (e.g. advanced robotics, artificial intelligence, 3D printing), is reshaping the worlds of work and learning is key for translating skills policy ambitions into achievements. [Cedefop's European skills and jobs survey](#) (ESJS) already showed in its first wave that about **14% of EU jobs were likely to be fully automated**, with such automation risks disproportionately affecting low-skilled people in routine jobs that offer little, if any, vocational training. [The COVID-19 pandemic, which accelerated the proliferation of digital working](#) and learning, has accentuated these trends.

Digitalisation has become a game changer, and its role in shaping the future of work, skills and learning now tops EU and national policy agendas. Scientifically sound data and analysis are crucial for evidence-based policy-making to accompany and shape change brought about by digital technology, the challenges linked to the pandemic and the ongoing green transition.

Fielded in summer 2021 in all EU27 Member States and Norway/Iceland (EU+), Cedefop's [second European skills and jobs survey](#) (ESJS2) collected information from a representative sample of about 46 000 adult workers on how digitalisation affects them, their skills match with their jobs and their readiness to invest in continuous vocational training to adapt to technological change.
